Developing Nirvana

Corey Butler, Author.io

2 years in 20 minutes

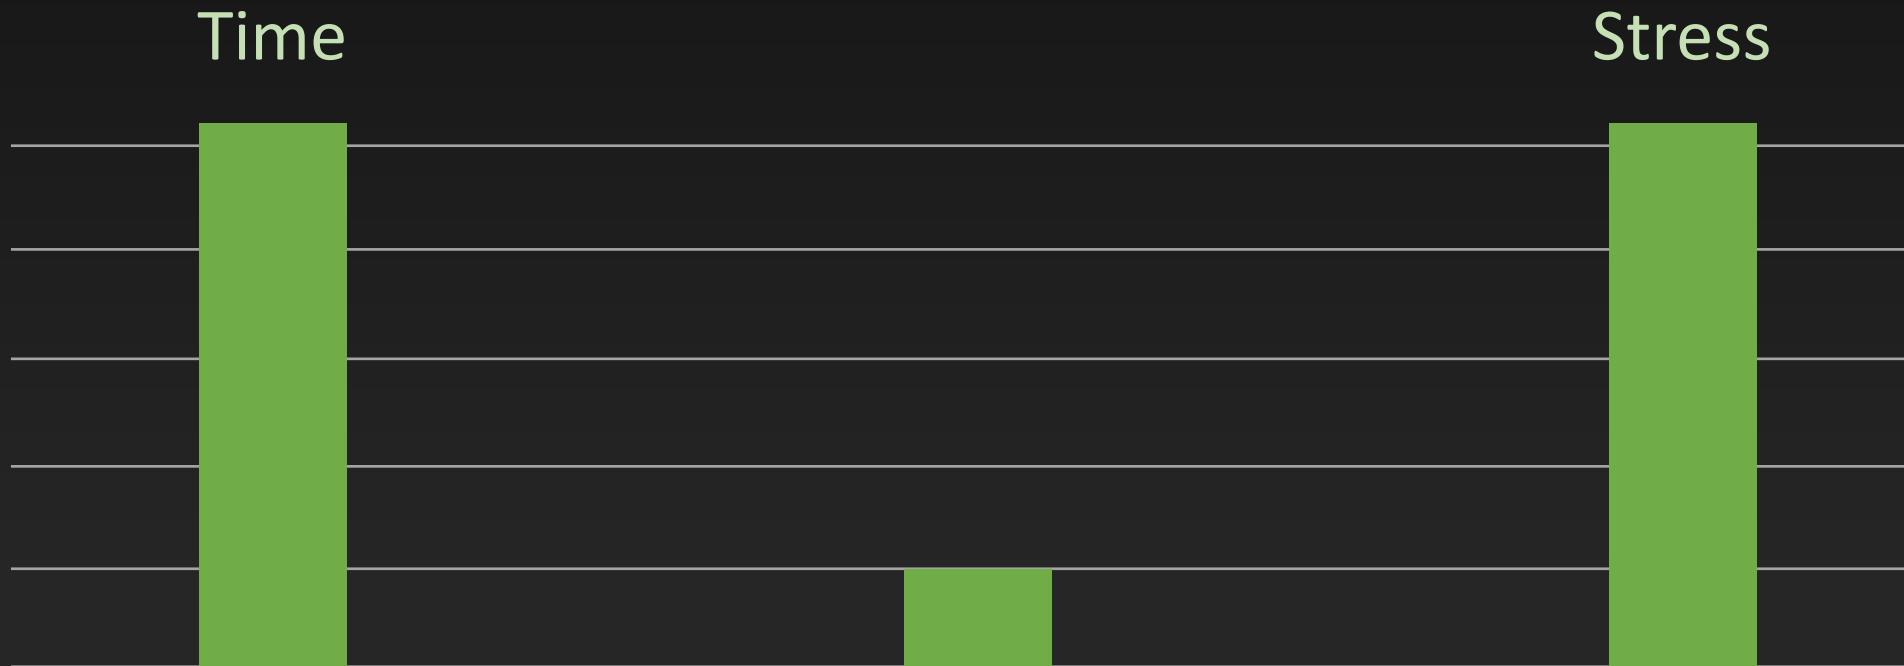

developing·na

A transcendent state in which there is neither suffering, desire, nor sense of self, and the subject is released from the effects of karma and the cycle of death and rebirth. It represents the **final goal** of Buddhism.

synonyms: [paradise](#) · [heaven](#) · [bliss](#) · [ecstasy](#) · [joy](#) · [peace](#)

Pursuing a state of contentment

Contentment

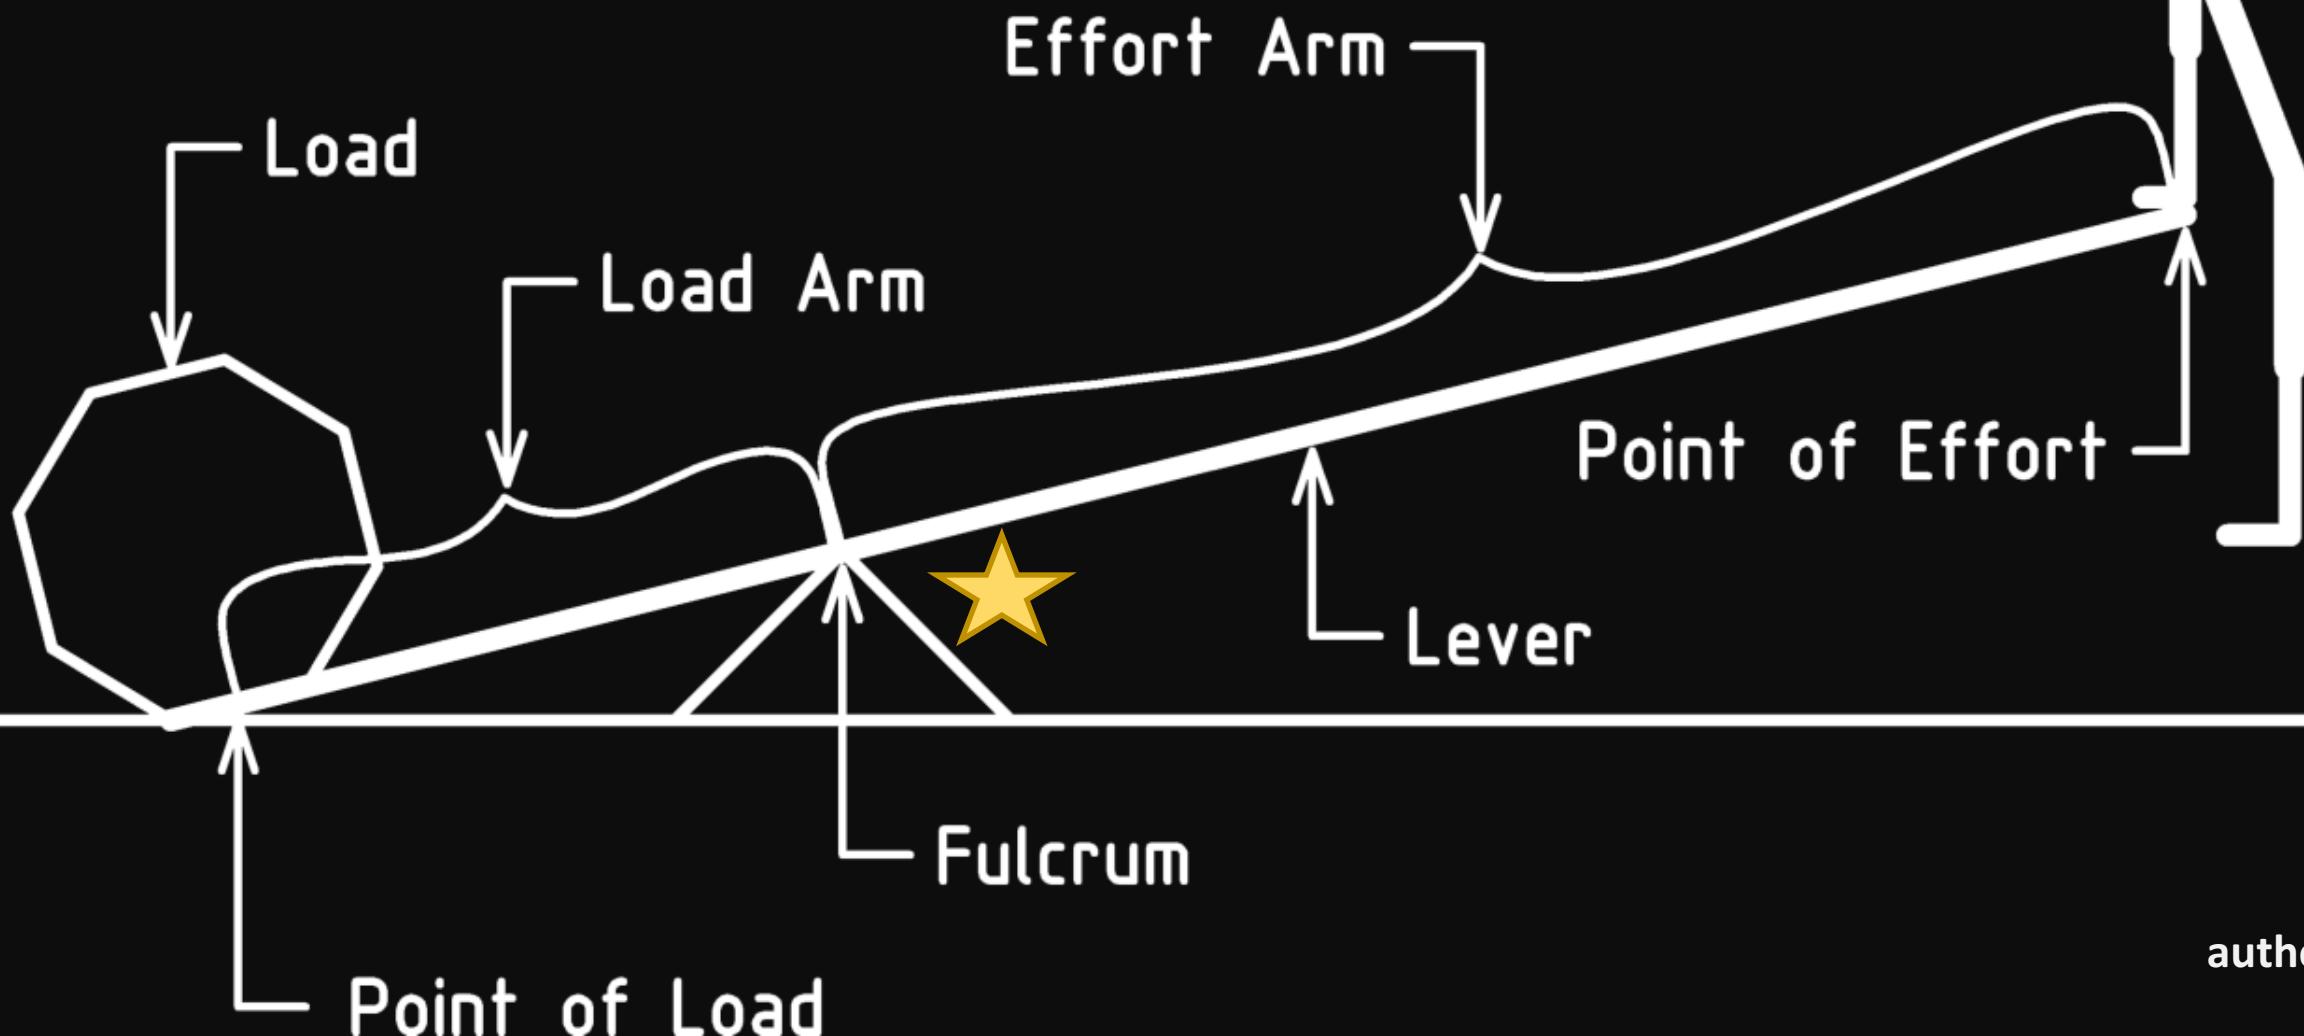

How?

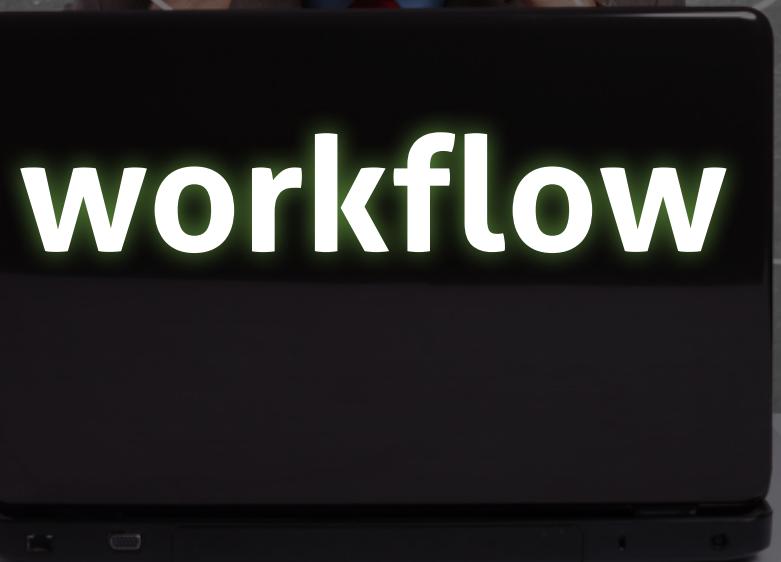

(hint: we don't)

Trick: Find the Fulcrum

(between stress | time | objectives)

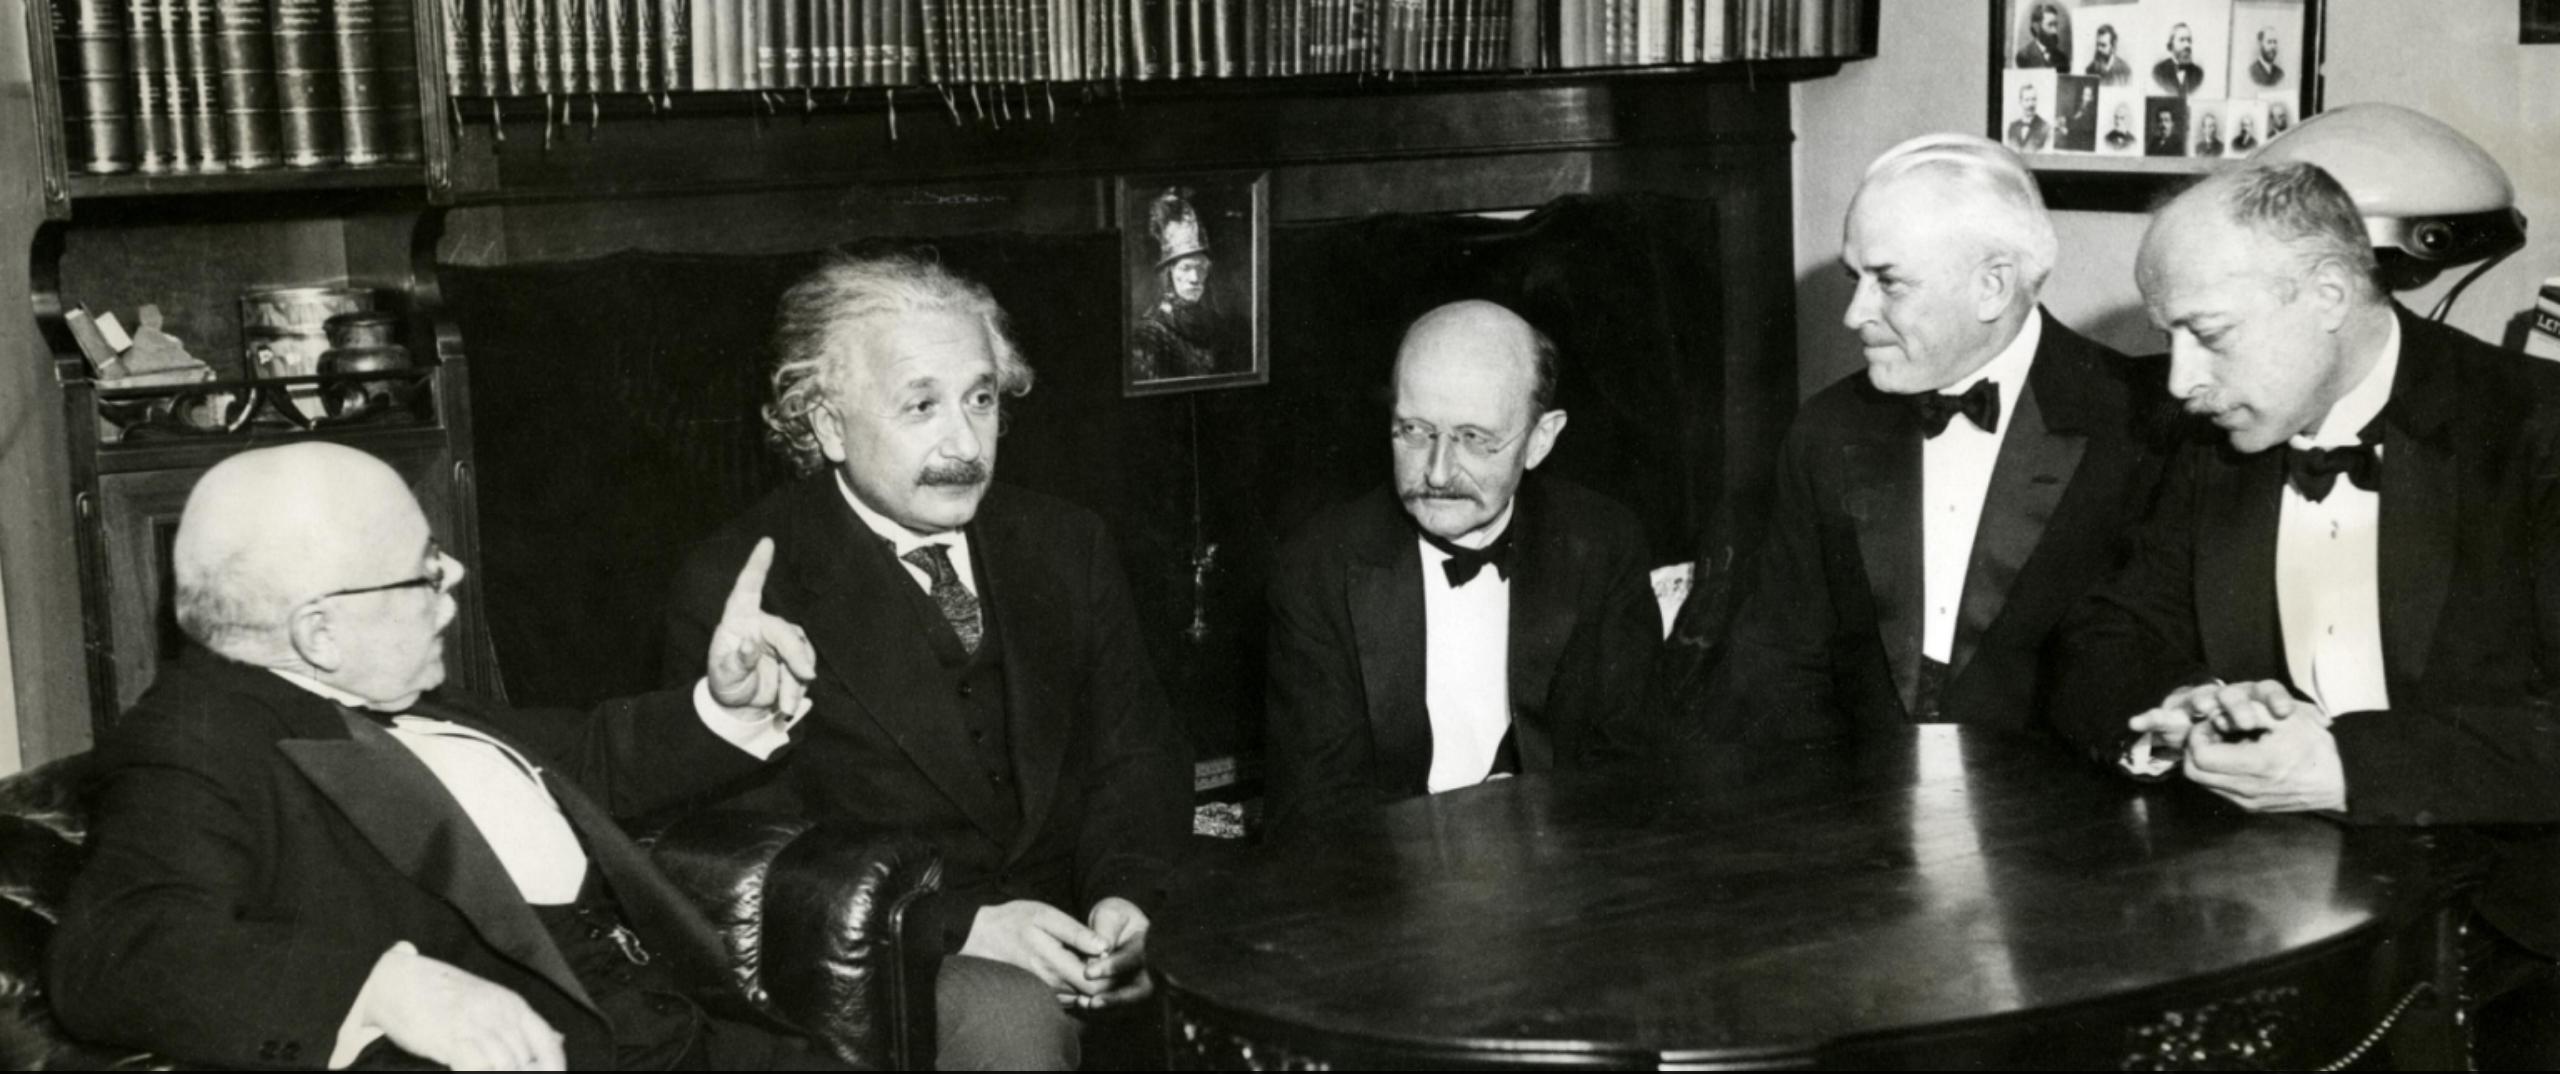

workflow

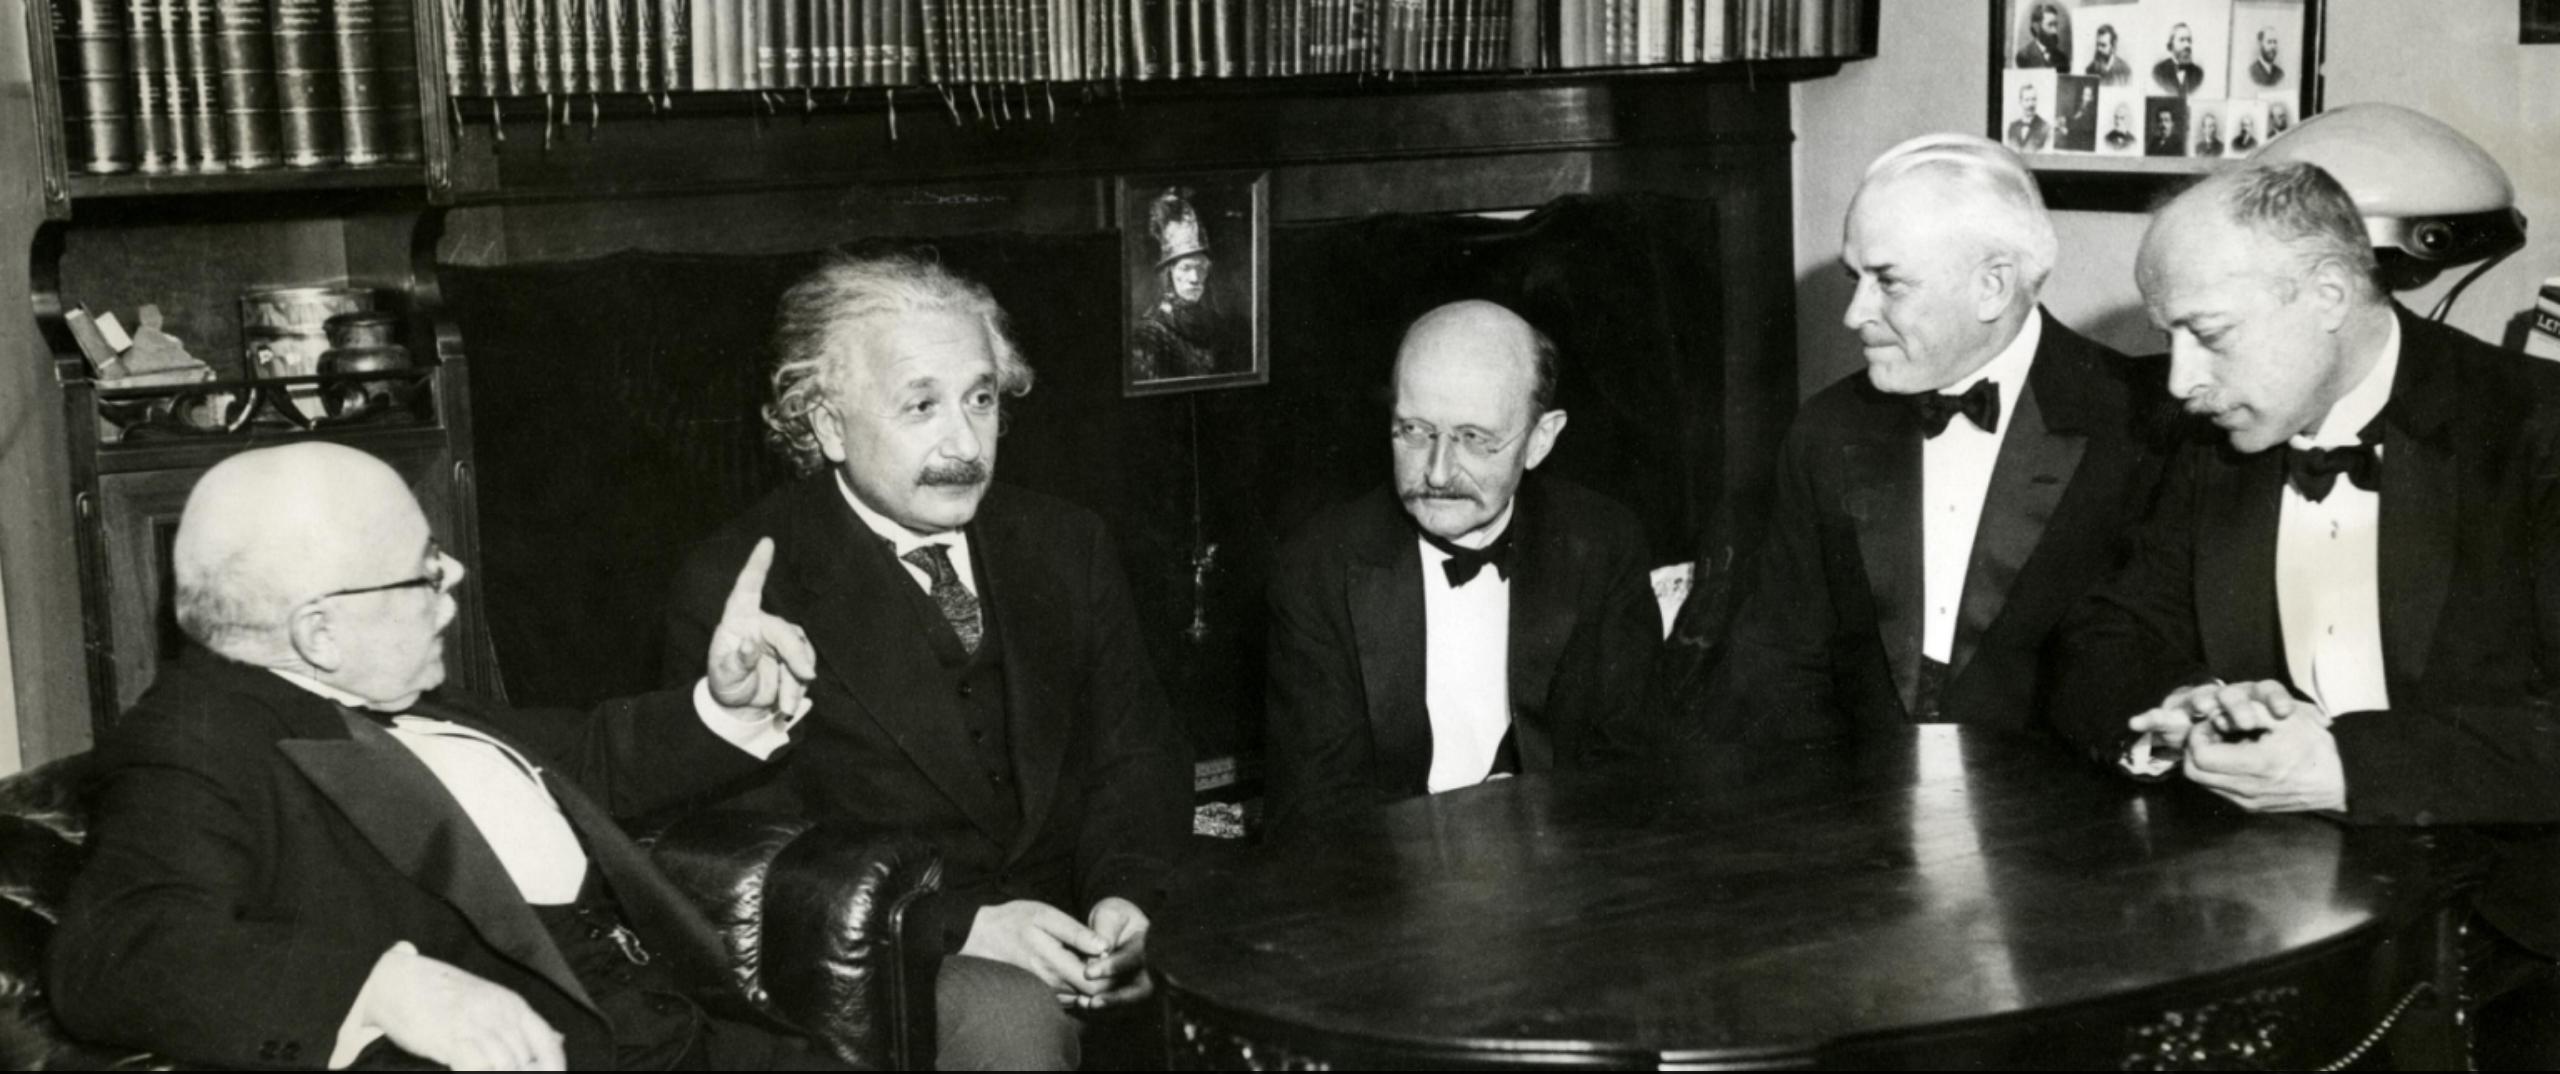

People think developers are smart.

Developers think developers are smart.

Smart != Super Human

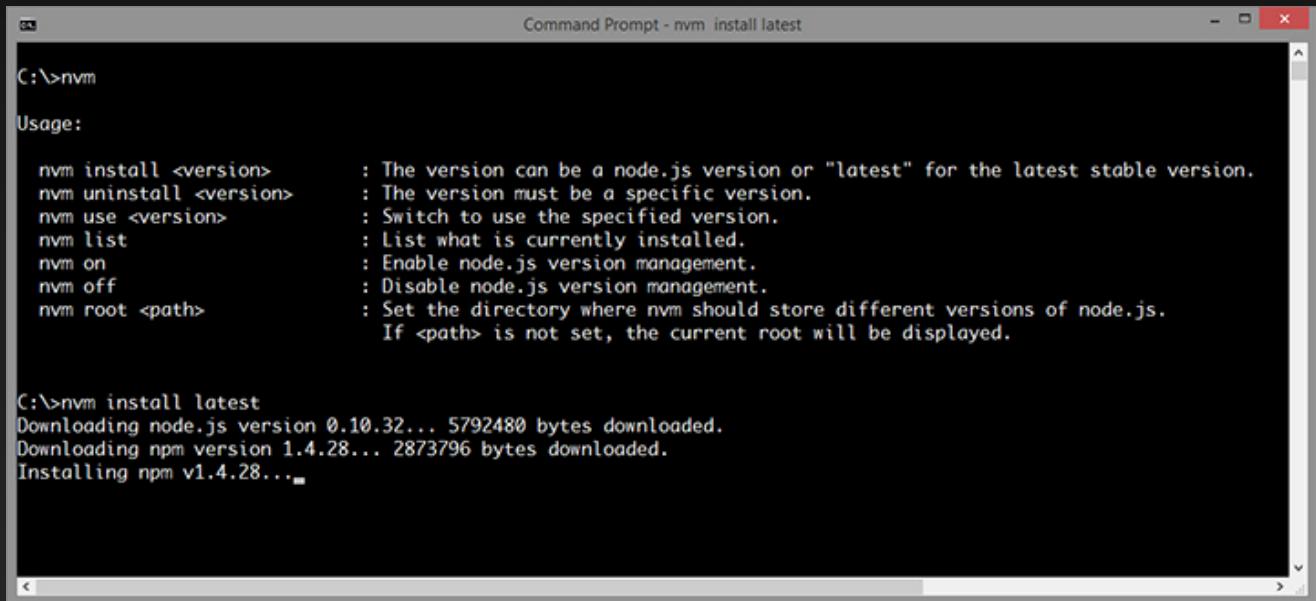

(even though we like to think so)

Like wine...
it's always changing.

Tip: Target continual change.

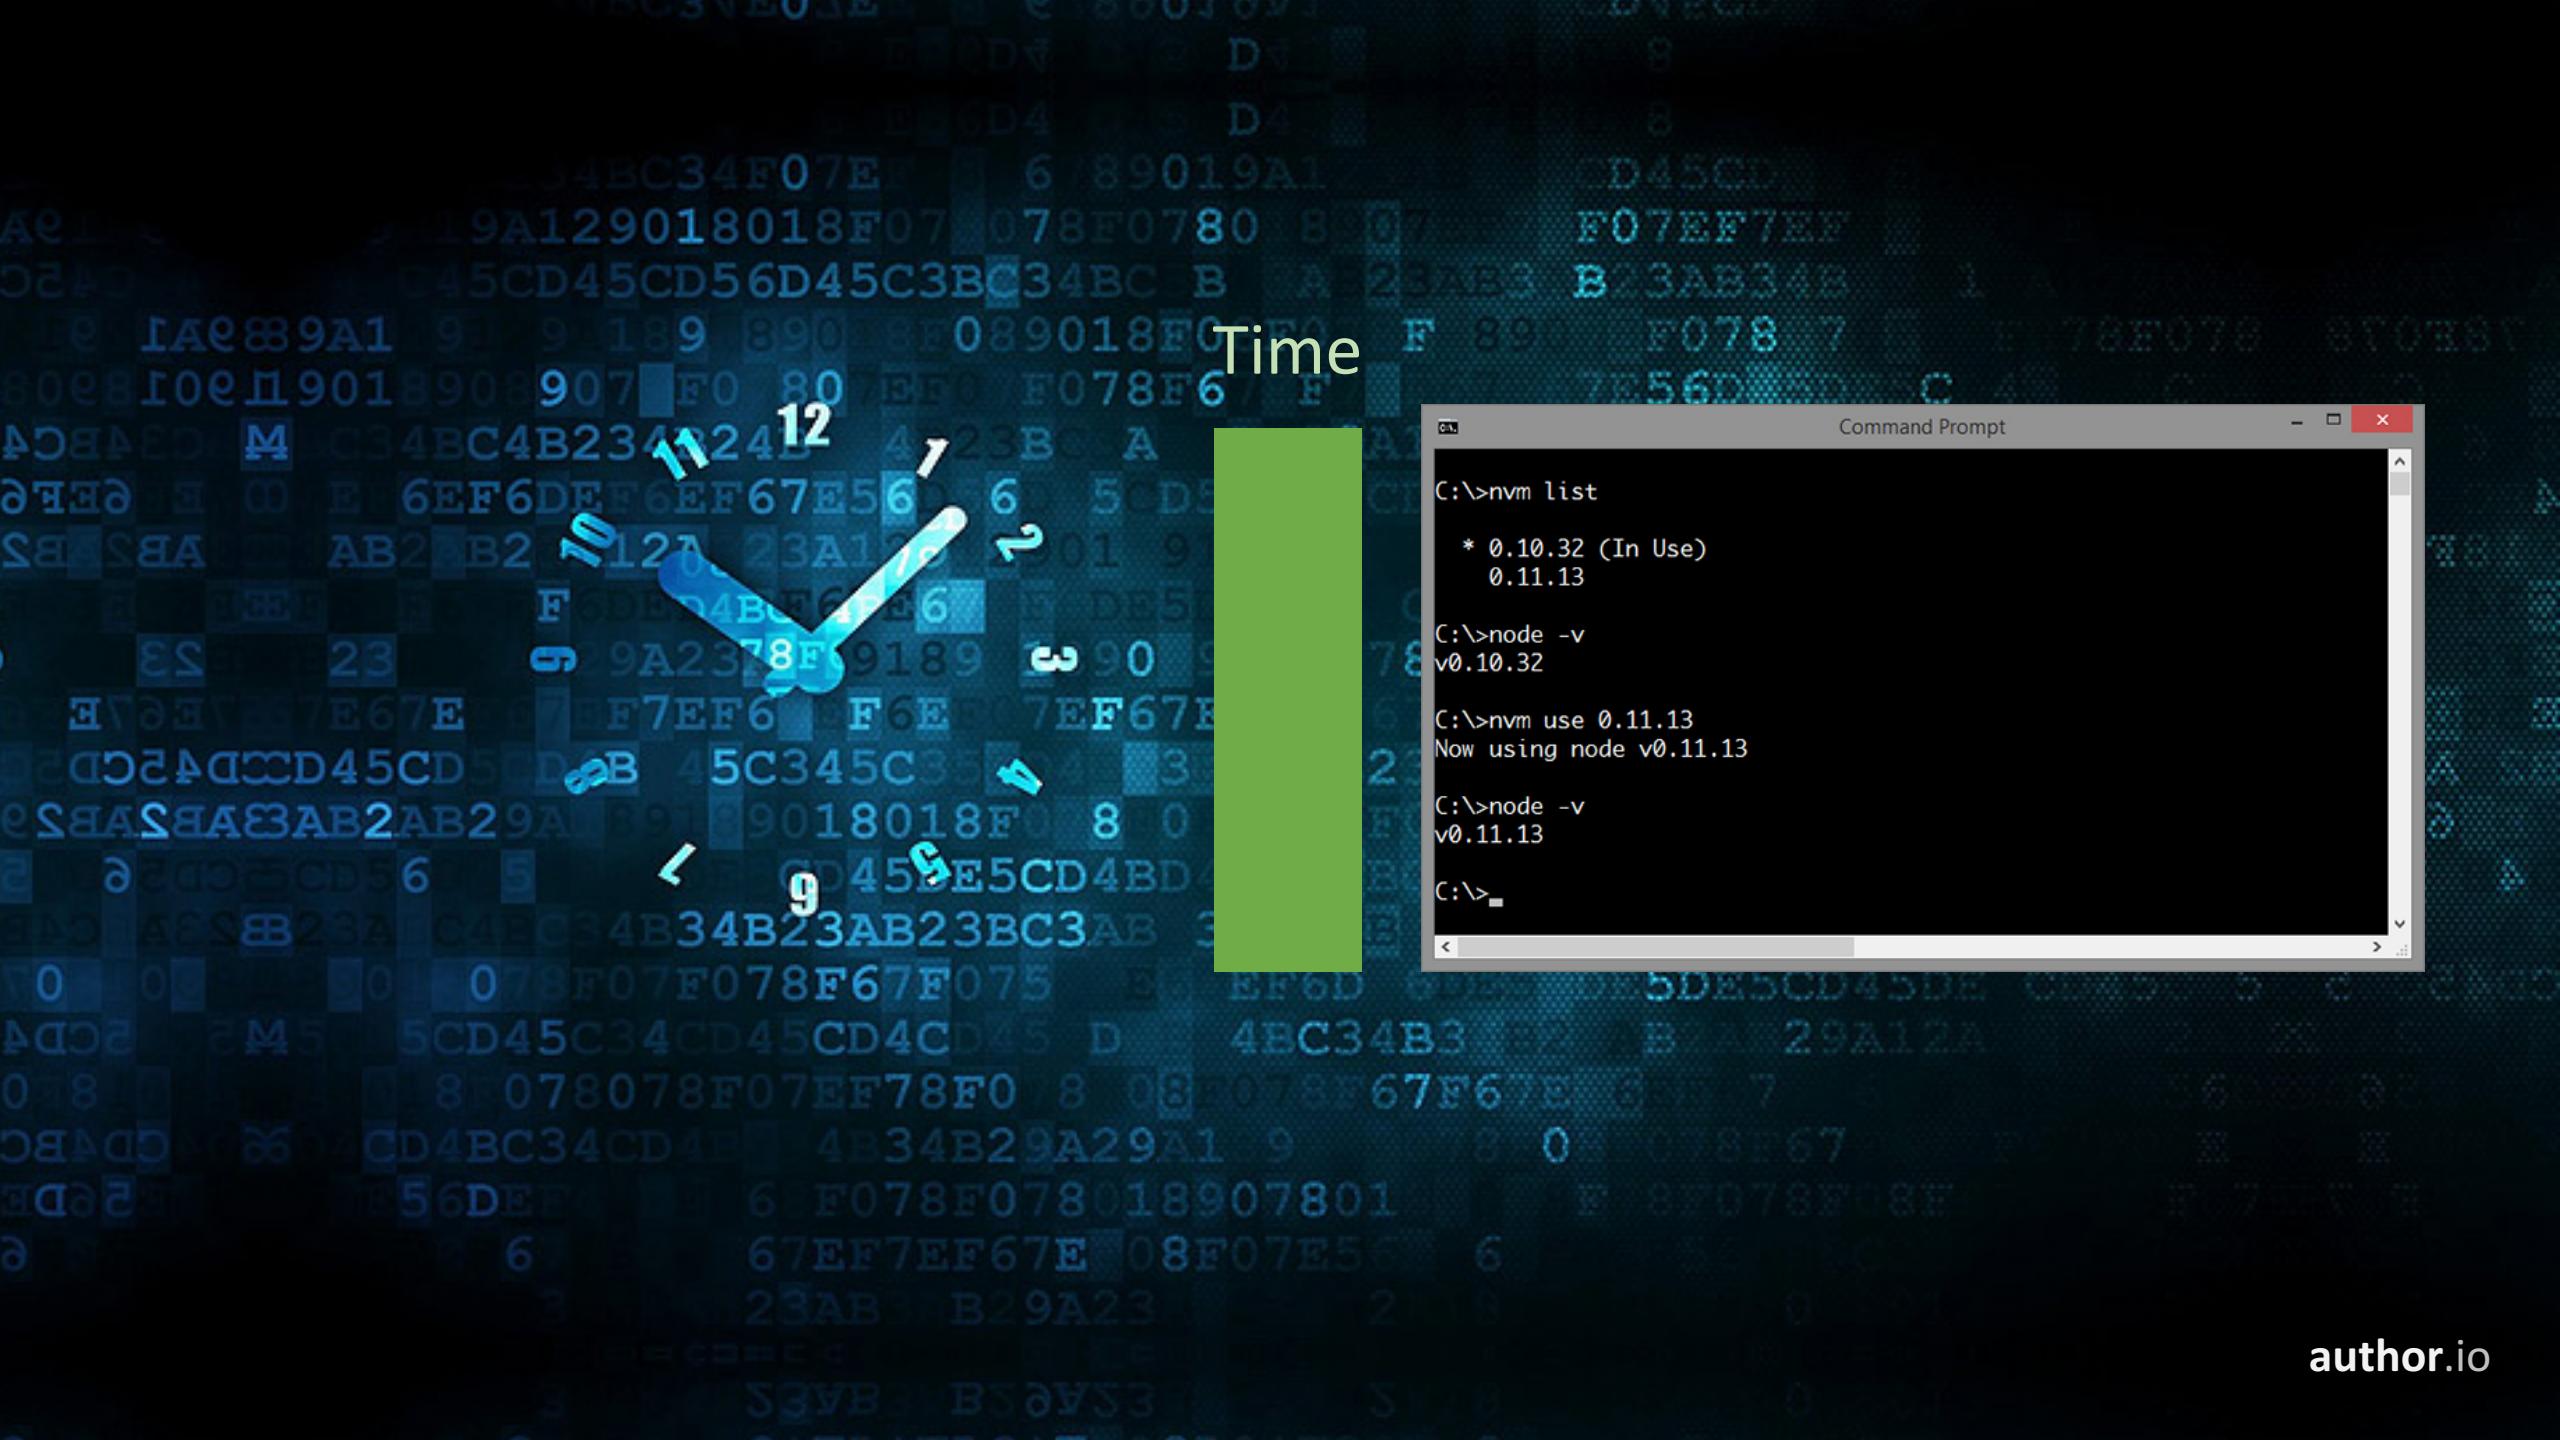

NVM for Windows

The screenshot shows a Windows Command Prompt window titled "Command Prompt - nvm install latest". The window displays the following text:

```
C:\>nvm
Usage:
  nvm install <version>          : The version can be a node.js version or "latest" for the latest stable version.
  nvm uninstall <version>         : The version must be a specific version.
  nvm use <version>              : Switch to use the specified version.
  nvm list                       : List what is currently installed.
  nvm on                         : Enable node.js version management.
  nvm off                        : Disable node.js version management.
  nvm root <path>                : Set the directory where nvm should store different versions of node.js.
                                    : If <path> is not set, the current root will be displayed.

C:\>nvm install latest
Downloading node.js version 0.10.32... 5792480 bytes downloaded.
Downloading npm version 1.4.28... 2873796 bytes downloaded.
Installing npm v1.4.28...  
...
```

Time

```
C:\>nvm list
* 0.10.32 (In Use)
  0.11.13

C:\>node -v
v0.10.32

C:\>nvm use 0.11.13
Now using node v0.11.13

C:\>node -v
v0.11.13

C:\>
```

What makes a project popular?

Most starred Node version manager for Windows

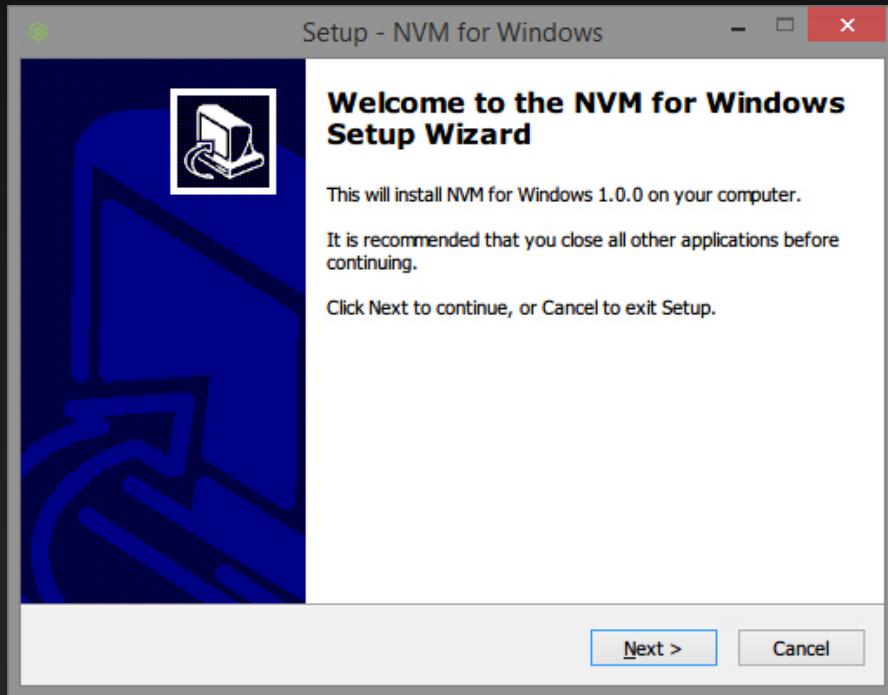

61,256 downloads of v1.1.1 (Released July '16)

70,428 downloads of v1.1.0

Coming soon in Arabic, German, Portuguese, Spanish, French, Japanese.

Contributors from across the globe.

NVM for Windows

Stress

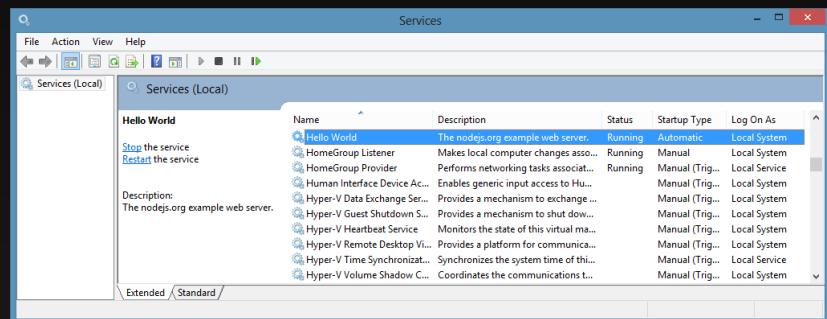

Tip: Ask about stress.

What makes people use a technology?

Trust

Trick: Piggyback.

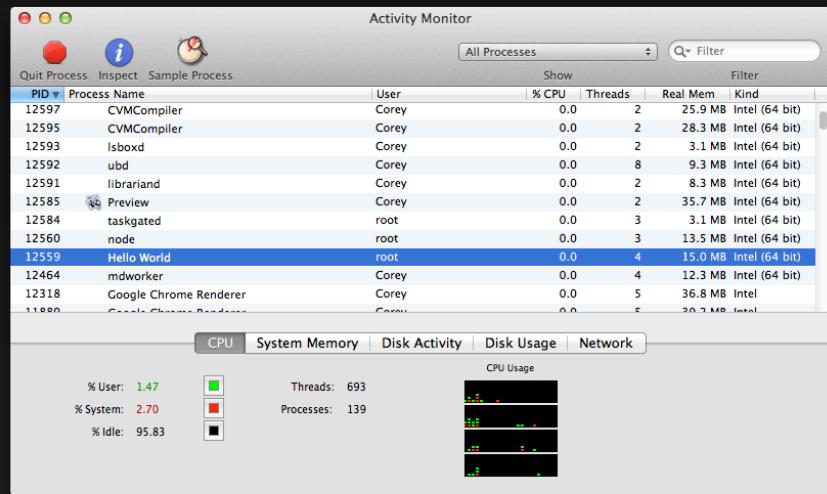

node-windows

```
var Service = require('node-linux').Service
```

```
// Create a new service object  
var svc = new Service({
```

```
  name: 'Hello World',  
  description: 'Example web server.',  
  script: '/path/to/helloworld.js'  
})
```

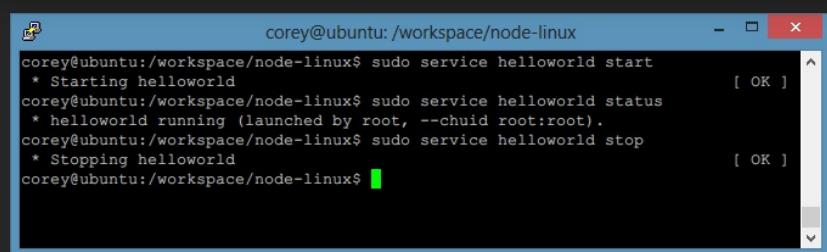

node-mac

```
// Listen for "install" event, indicating  
// process is available as a service.
```

```
svc.on('install', function() {  
  svc.start()  
})
```

```
svc.install()
```

node-linux

DX Today

Use Case: How Fenix increased code quality and usefulness .

NGN

```
// Define a person
var Person = new NGN.DATA.Model({
  autoid: true,
  fields: {
    firstname: null,
    lastname: null,
    title: null
  }
})

// Create a data entity representing a person
var employee = new Person({
  firstname: 'John',
  lastname: 'Doe',
  title: 'Developer'
})

// Monitor the data model for changes
employee.on('field.update', function (change) {
  ...
})
```

Chassis

```
// Custom SASS Button
@include chassis-button(
  default: (
    bg-color: #FFF,
    text-color: #77787C,
    has-border: true,
    border-thickness: 2px,
    border-color: #D1D2D4
  ),
  hover: (
    bg-color: #E2E3E5,
    text-color: #77787C
  ),
  active: (
    bg-color: #DADBD,
    text-color: #77787C
  )
));
```
